

# Transforming Education

With the **Dataspire IT Managed Service**

**Think Digital Education, Think Digital Transformation, Think Dataspire!**

# What is a Managed IT Service?

**Empowering and Enabling Education with Reliable Technology**

With so much technology central to your school day, it is increasingly unrealistic to expect a traditionally small in-house IT department to efficiently or effectively manage, update, fix, support and develop every element of your IT estate.

**A Managed Service is a fit-for-purpose way to manage and support the complex and extensive ICT infrastructures now found in modern schools.**

It also provides immediate access to a large team of professional education ICT specialists, with up-to-date skills who can make the most of the technology and ICT budget you have available for your staff and your learners.

## The Dataspire Managed IT Service provides:

### 24/7 IT Support

Ensuring uninterrupted teaching and learning with round-the-clock IT support, eliminating downtime and resolving issues promptly.

### Cost Efficiency

Reducing operational costs with a fixed, predictable IT budget and removing the need for in-house IT staff.

### An Enhanced Learning Experience

Providing students and teachers with access to the latest technology and enabling an interactive and engaging learning environment.

### Security and Compliance

Protecting sensitive student data with robust cybersecurity measures and ensuring compliance with educational standards and regulations.

### Scalability

Easily scaling your IT infrastructure to accommodate your growing learning community and evolving educational needs.

# Comprehensive IT Solutions *Tailored for* Your School

## Everything You Need for a Seamless Educational Experience

Many of the schools we speak to have been exposed to serious risks or failures due to IT employees moving on, not keeping pace with emerging technologies, being unwilling to change, or suddenly becoming unavailable through unexpected illness.

In line with the DfE Digital and Technology Standards, the Dataspire Managed Service has been designed to bring you peace of mind and to free your teaching and admin staff to get on and do what they do best, while we take care of your IT ecosystem.

### Let us handle your:

#### **Cyber Security:**

We will implement advanced security protocols to safeguard your school against cyber threats and data breaches.

#### **Device Management:**

We will provide and maintain your laptops, tablets, and other devices, ensuring they are always updated and functioning properly.

#### **Network Management:**

We will optimise and manage your school's network to ensure fast, reliable connectivity access for all students and staff.

#### **Cloud Services:**

We will enable collaboration and storage with secure, accessible cloud solutions tailored for your educational environment.

#### **Software Management:**

We will ensure all educational software is installed, updated, and fully operational, providing your teachers and students with the tools they need.

#### **Data Backup and Recovery:**

We will protect critical data with regular backups and quick recovery options in case of data loss.

# Embracing Digital Transformation in Education

## What is Digital Transformation?

For education, Digital transformation involves integrating digital technology into all areas of education and administration. This means using advanced tools and systems to enhance teaching methods, streamline administrative processes, and improve student outcomes.

## What that looks like...

### Safeguarding & Security

Your school is safer and more secure because of technology, and you've created safe and secure spaces for your students, staff and data.

### Harmonised Technology

Your systems are integrated and streamlined for more efficient and effective teaching, learning and operations.

### Energy Efficiency

Your school is saving time, saving money and saving the planet through the use of technology.

### Reducing Workloads

You're able to prioritise the well-being of your colleagues by reducing workloads with technology and enabling your teachers to focus on what they do best.

### Digital Confidence

You've removed barriers to teaching and learning by removing the fear of technology and are confidently building your students' skills for the future.

### Anywhere, Anytime, Accessible Learning

You're bridging the gap and ensuring no student gets left behind by providing access to learning for all.

At Dataspire, we are making a significant and positive impact on education by driving whole-school improvement and reducing the associated costs through Digital Transformation.

# Schools Transformed by Our Services

## Real Results from Real Schools

---

### The Sovereign Trust

“Dataspire’s greatest strength is, without doubt, its people. Our Trust now has access to a team of experts with the broadest possible spread of specialisms and expertise. A team that perfectly interacts with each other to ensure nothing falls through the cracks. But most importantly, Dataspire staff all display a predominant character trait - they care. Working with Dataspire provides peace of mind that we’re not on our own and everything is going to be ok.”

### Chesterfield High School

“Dataspire lives up to and often exceeds, our expectations as the service improves week by week. We wanted to be able to put our trust in an organisation that could look after our needs without us having to overly invest too much time. Dataspire has done that so far and I’m looking forward to progressing onto new developments that we can make to improve outcomes across the school.”

### University Technical College Norfolk (UTCN)

“20 years ago, you could employ one person to do everything in terms of school ICT, but today, it’s far too complicated to expect just one person to be able to manage all the requirements that a school has.

Now, you need a range of specialists, and that’s what Dataspire provides. If we need help with a wireless issue, we can call on support from the Dataspire wireless expert. If it’s something to do with Microsoft 365, they’ve got someone who can do that. Being able to deal with experts has been hugely important for us.”

### University of Liverpool Maths School

“Dataspire has helped us through the whole process of designing and commissioning an ICT solution for our school. Despite the huge challenges of the Coronavirus pandemic, made even more complex by the fact that our school opened in temporary facilities whose refurbishment was also delayed by the pandemic, Dataspire ensured we had a fully functional wired and Wi-Fi network, staff and student computers, and much else.

More than this, they were happy to support our preferences even where they were quite different to those of most normal schools. Amongst other eccentricities, we use a hybrid of Google Workspace for Education and Microsoft 365, and this has worked smoothly for us because of the support that Dataspire has provided.”

## Partner with us for

# Reliable, Secure, & Efficient IT Support

- **Would you like to use your IT budget more effectively over the next few years?**
- **Would you like to work with experts who will take care of the techy bit so that you don't have to?**
- **Would you like to develop an IT vision that prepares pupils for the future world of work?**
- **Are you ready to transform your school's IT?**

With a Dataspire Managed IT Service, you can create a digitally enabled learning community at the forefront of technology, taking steps towards a more efficient, secure, compliant and innovative educational environment that is developing confidence and improving outcomes for all.

If your current IT support service isn't helping you do this, maybe it's time to speak to Dataspire. We'd love to hear from you, so contact us today to learn more about how we can create ICT confidence for your school.
